## **Graham-Patten System to unveil exciting new product developments at NAB 2005**

*"We are back and dedicated to supporting our loyal customer base"  
– Len Dole, GPS president.*

Nevada City, CA: Graham-Patten Systems, a division of The ISIS Group, is bringing a full palette of leading-edge products to the NAB 2005 Convention, to be held in Las Vegas April 16 thru 21. In addition to its existing range of **AES3id Converters** and **SoundPals™** digital audio format conversion, processing and distribution modules, Graham-Patten (Booth C1836) will spotlight new advances to the landmark **D/ESAM Series Digital Audio Mixers**. The new D/ESAM 8000 utilizes the same Emmy® Award-winning innovation that made the D/ESAM 820, 400 and 230 industry-accepted standards.

The **D/ESAM 8000** employs the Klotz VADIS mixing engine and routing system. User features make the 8000 an ideal choice for broadcast and post facilities making the transition to multi-channel surround sound for DVD, DTV, and other digital delivery formats. The four-output/16-channel **D/ESAM 400** is ideal for mid-sized edit suites, while the **D/ESAM 230**

offers a cost-effective solution that integrates a control console and electronics chassis in single tabletop unit. Standard features on all D/ESAM mixers include send outputs, monitor sub-mixer, fader range, user configuration registers and D/MEM write protection.

The ISIS Group acquired Graham-Patten Systems in October 2004 from Klotz Digital America. "Customers have been delighted with the re-emergence of the excellent GPS product line," confides company president Len Dole. "We are back and dedicated to supporting our loyal customer base." ISIS and Graham-Patten distributor relationships are being fully integrated, along with the companies' physical location, accounting and manufacturing systems.

"Graham-Patten enjoys an established reputation as the world's leading developer of high-performance digital audio products for the professional video industry," offers Tess Pender, Marketing Manager. "Graham-Patten Systems and The ISIS Group are dedicated to providing the best in quality, service and support to the professional broadcast, video, and post-production markets."
