ISIS/Graham-Patten Sonarae GUI application now available with Grass Valley EDIUS 5.1

Grass Valley, Calif., May 19, 2009 - Sonarae's GUI application will be included as a free bonus item to all purchasers of EDIUS 5.1, the latest version of the Grass Valley™ EDIUS® multi-format/multi-resolution nonlinear editing software package. Owners of the Sonarae Audio Monitoring System and EDIUS 5.1 will be able to control the Sonarae audio processing unit from their desktop. Users can connect the AES/EBU outputs from their appropriate equipped EDIUS system (such as EDIUS SP-SDI or EDIUS HD) to the Sonarae processing unit. Then, after final editing, the Sonarae can be controlled from the desktop for final delay matching and QA.

Len Dole, President of ISIS/Graham-Patten, stated that this level of cooperation will significantly enhance end user access to the already successful Sonarae system.

“Sonarae makes an excellent audio monitoring accessory to the EDIUS line of editing systems,” said Mark Narveson, Grass Valley Director of International Marketing for Desktop and Enterprise Solutions. “EDIUS users can now do their final audio QA pass without worrying about altering the audio mix and effects added during their EDIUS editing session.”

Sonarae can be sourced through the normal ISIS/Graham-Patten US and International distribution channels. The GUI for Sonarae will be added to the bonus materials included with EDIUS 5.1. This will allow end users to assess the functionality of the Sonarae system prior to adding it to their installation.

ISIS Group

Video / Audio Signal Management

About The ISIS Group, Inc:

ISIS Group manufactures high-performance video, audio, and signal management and processing solutions for the television, post-production, and multimedia industries worldwide. In 2004, ISIS acquired Graham-Patten Systems, a Grass Valley company with an established reputation as the world's leading developer of high performance digital audio products for the professional video industry. Both companies are known for technical innovation, product reliability, and outstanding customer support. Information about ISIS Group is available at <http://www.isis-group.com> and Graham-Patten is at <http://www.gpsys.com>

About Grass Valley: 50 Years of On-Air Innovation

With a rich history serving the broadcast and professional video industries, the Grass Valley name is synonymous with innovation, leadership, and performance. With a full range of products and services supporting many of the world's most high-profile television events, Grass Valley offers the most comprehensive portfolio of flexible and cost-effective digital technologies and systems available. Customers deploying Grass Valley solutions include most of the world's leading broadcast and teleproduction facilities, independent video professionals, as well as emerging content creators and distributors providing broadband, telecommunications, and transmission services. When you're watching news, sports, or entertainment programming, whether on a TV, the Web, or a mobile phone, you're watching Grass Valley at work.
